

Compatibility and Retesting Report

1. Cross-Browser Compatibility Testing

1.1 Browsers Tested

- Google Chrome
- Mozilla Firefox
- Microsoft Edge

1.2 Test Results

Feature	Chrome	Firefox	Edge
Login functionality	Pass	Pass	Pass
Error message UI	Fail	Fail	Fail
Product sorting	Fail	Fail	Fail
Cart icon placement	Fail	Fail	Fail
Checkout process	Fail	Fail	Fail

Observation:

The same issues appear on all browsers, which indicates that the problems are related to the application logic or UI design rather than browser compatibility.

2. Retesting of Week 1 Bugs

After completing compatibility testing, all bugs reported in Week 1 were retested.

Bug ID	Description	Previous Status	Current Status
BR-01	Unclear error message	Open	Open
BR-02	Error message UI overlap	Open	Open
BR-03	Product sorting issue	Open	Open
BR-04	Checkout allowed with empty cart	Open	Open
BR-05	Incorrect product images	Open	Open

Retesting Result:

All reported bugs are still reproducible. No fixes have been applied yet, so the status of each bug remains **Open**.

3. Conclusion

During Week 2, a structured test plan was created and advanced manual testing techniques were applied. Black-box testing helped validate input handling, while cross-browser testing confirmed that issues persist across different browsers. Retesting verified that previously reported bugs are still present and require fixing.
